

## Non-LLM Resource Information

Below is a list of external resources used and recommended by QUAD Tutors

Logo	Name	Link	Description
	Datacamp	<a href="https://www.datacamp.com/">https://www.datacamp.com/</a>	DataCamp offers interactive courses and projects in data science, analytics, and programming, with hands-on coding exercises in languages like Python, R, and SQL.
	ProgrammingR	<a href="https://www.programmingr.com/">https://www.programmingr.com/</a>	ProgrammingR provides tutorials, examples, and explanations for programming concepts, with a focus on data science topics such as R, Python, machine learning, and statistics.
	Quizlet	<a href="https://www.quizlet.com">https://www.quizlet.com</a>	Quizlet is an online learning platform that allows users to study with flashcards, practice tests, and interactive games, making it easier to memorize and review concepts across a wide range of subjects.
	Wolfram Alpha	<a href="https://www.wolframalpha.com/">https://www.wolframalpha.com/</a>	Wolfram Alpha is a computational knowledge engine that answers questions and solves problems across math, science, and data analysis by computing results and presenting structured, step-by-step information.
	Desmos	<a href="https://www.desmos.com/">https://www.desmos.com/</a>	Desmos is a graphing calculator and math exploration platform allowing users to visualize equations and interact with mathematical concepts, making it easier to understand and experiment with ideas in math and related fields.
	Stack Overflow	<a href="https://stackoverflow.com/">https://stackoverflow.com/</a>	Stack Overflow is an online community where developers ask and answer programming questions, sharing practical solutions and building a large, searchable knowledge base for coding and technical

			problem-solving.
	Geeks for Geeks	<a href="https://www.geeksforgeeks.org/">https://www.geeksforgeeks.org/</a>	GeeksforGeeks is an online learning platform offering tutorials, coding problems, and interview preparation resources to help users build skills in computer science, programming, and data science, focusing on practical understanding and problem-solving.
	W3 Schools	<a href="https://www.w3schools.com/">https://www.w3schools.com/</a>	W3 schools provides code examples and tutorials on many programming languages.
	3 Blue 1 Brown	<a href="https://www.youtube.com/c/3blue1brown">https://www.youtube.com/c/3blue1brown</a>	3 Blue 1 Brown is a YouTube channel which covers topics in math and adjacent fields such as physics and CS. There is an emphasis on the visualization of core ideas.
